

INTRODUCING LV RESCUE

Designed For The Safe Rescue
Of Personnel Working In Low
Voltage Switchboards And
Electrical Substations.

The AERO Kit Low Voltage Safety kit is crucial for electricians working with live equipment. It includes a heavy-duty waterproof bag with reflective writing for easy identification in low-light situations.

The kit features Australian-made size 11 insulating gloves that meet AS2225 standards. Our purpose built rescue hook has been tested up to 15kv. The kit is built to comply with state energy providers' requirements and AS4836:2011 regulations.

Features

- Australian Made Insulating Gloves (1000v)
- Australian Made Rescue Hook (Tested to 15kv)
