

## WASHPROOF PLASTER

- ✓ MDD Compliant
- ✓ UKCA Marked & CE Marked

Latex free and hypo-allergenic, AeroEssentials™ Washproof Plasters are an economy product that provides an effective solution for injuries and wounds that require an extra wide covering. Each plaster is strong and secure and can withstand regular handwashing to protect the injured wound area. The plasters stretch, bend, flex, and conform to body contours for maximum adhesion. This prevents lifting and edge curling and keeps the wound clean and comfortable. These durable plasters are both hypo-allergenic and latex free and can be used by a diverse range of patients including those who suffer from skin complaints or allergies. AeroEssentials™ Plasters also contain a soft cushioned, non-adherent pad for comfort, cleanliness, and ease of removal. These plasters provide everything you need for treating a variety of injuries and wounds that require an extra wide covering.
