AERO BURN™

BURNS KIT (7 PIECES)

- MDD Compliant
- UKCA Marked

ABK01

AeroBurn™ Burns Kit is designed to deliver quick, soothing support for minor burns, scalds and sunburn in everyday settings. It combines cooling burn gel dressings and gel sachets with a soft conforming bandage to help protect the affected area after initial care. Compact and easy to keep on hand, it suits workplaces, vehicles, holiday homes and household first aid supplies where a simple, purpose-built burns solution is needed.

TOTAL **7** PIECES

The burn gel components contain a water based formula that helps draw heat away from the skin while hydrating the surface. This cooling effect provides welcome comfort after a burn incident and supports relief while further care is arranged if required. The dedicated burn dressing offers larger area coverage, while the smaller gel sachets suit targeted application on localised burns.

The included conforming bandage is designed to gently secure the burn dressing in place without adding unnecessary pressure. This helps maintain consistent contact between the cooling gel layer and the skin while allowing for movement during daily activity.

Keeping a dedicated burns kit available provides added reassurance for families, staff and visitors, complementing general first aid equipment in busy environments.

- **Purpose-built burn care:** combines cooling gel dressings, sachets and a securing bandage for minor burns.
- **Soothing cooling effect:** hydrogel helps draw heat from the skin for added comfort.
- **Easy to keep on hand:** suits workplaces, vehicles and household first aid kits.
- **Simple to use under pressure:** clear separation of components supports fast selection.
- **Versatile everyday cover:** suitable for minor burns, scalds and sunburn.
