

SINGLE USE BAG VALVE MASK RESUSCITATORS

- ✓ MDD Compliant
- ✓ UKCA Marked & CE Marked

Bag Valve Mask Resuscitators come preassembled and ready to use. They combine quality and value. The bag is completely transparent for internal visibility and the design incorporates the first locking system attaching the oxygen tubing to the bag. Bag Valve Mask Resuscitator provide a cost effective alternative which is easy to use and provides total reliability. Designed to meet the ERC's tidal volume guidelines, they feature 360° swivel for ease of use with face mask or endotracheal tube. Single wall construction provides optimal sensitivity. Child and infant bags complete feature a H2O safety pressure release valve, minimising the risk of over inflating the lungs with a clear non-breathing valve. Excellent recoil recovery following bag compression. Latex free.
