

CPR MANIKIN FACE SHIELDS

- ✓ MDD Compliant
- ✓ UKCA Marked & CE Marked

Our AeroShield™ CPR Manikin Face Shield offers protection for those administering CPR against the manikins they are practising on. Additionally, it also helps to simulate the use of a CPR face shield so users are aware and understand how they should be used in real life-saving scenarios. For ease, the AeroShield™ CPR Manikin Face Shield is stored in a dispensing box and can be rolled out so a new face shield can be taken each time. Although anti-bacterial wipes and cleaning wipes can prevent germs from spreading, especially where multiple users might practise on one manikin, this training face shield also boasts an anti-microbial filter. The AeroShield™ CPR Manikin Face Shield has been produced using an advanced film that helps to simulate the feeling of skin. This is also another way that lifelike training scenarios assist students and teachers with understanding of what could happen in a life-saving scenario.

AVAILABLE IN:

Box 36

- ✓ 12 Months
- ✓ Latex free
- ✓ One size fit
- ✓ Advanced film
