

## GAUZE SWABS - STERILE AND NON-STERILE

- ✓ MDD Compliant
- ✓ UKCA Marked & CE Marked

Balancing a combination of softness alongside a lightly abrasive texture, the AeroSwab™ Gauze Swabs offer gentle application for wounds and medical stitches. They also offer premium quality that guarantees optimum comfort and performance. The swabs offer excellent absorbency thanks to their eight-ply design. They are ideal for cleaning wounds and surgical stitches. The swabs can be soaked in a cleansing fluid for optimal wound preparation, clearing away debris and bacteria from the site before redressing the wound. Suitable for sensitive wounds such as surgical stitching or healing scars, the AeroSwab™ Gauze Swabs provide effective protection against bacteria. They also protect any weeping or bleeding wounds during cleaning. For those suffering from sensitive wounds, this makes dressing changes anxiety-free and comfortable. There is also no likelihood of snagging against surgical stitches or wounded skin, making dressing changes painless.
