

## Hand Sanitisers

- ✓ MDD Compliant
- ✓ UKCA Marked & CE Marked

Throughout the day, hands can gather germs from various sources such as direct contact with people, contaminated surfaces, food, and animals. Touching is a significant transmission method, responsible for 80% of infections. To combat this, incorporating AeroCleanse™ hand sanitizer into your daily hygiene routine provides a quick and convenient solution for sanitizing hands on the go. This sanitizer effectively kills 99.99% of germs with its 75% ethanol alcohol content. It's designed to be non-sticky and dries quickly in the air, eliminating the need for washing, rinsing, or drying hands afterward. Additionally, AeroCleanse™ includes moisturizers, leaving hands feeling refreshed and hygienically clean.
