

WOUND CLOSURES

- ✓ MDD Compliant
- ✓ UKCA Marked & CE Marked
- ✓ Latex Free

AeroPlast™ Wound Closure Strips offer a painless alternative to healing minor incisions or skin lacerations. The strips are easy to use and can facilitate fast wound closure without the invasion of anaesthetics or additional scarring from surgical stitches. Each box contains 50 pouches with three strips included per pouch. They offer robust strength when covering minor wounds, allowing the skin to heal quickly. The AeroPlast™ Wound Closure Strips are also latex free as they use our SupaBond™ Adhesive, which means they can be suitably used on someone who suffers from latex allergies. SupaBond™ also ensures greater wound security as edge curling and lift up are prevented. The neat and simple design provides an almost transparent wound care option. Its minimalist design offers a more clinical appearance whilst being completely painless to use.

AVAILABLE IN:

5 Strip (Box 50)

3 Strip (Box 50)
