

Wall Bracket For Lifepak 1000 AED

- ✓ MDD Compliant
- ✓ UKCA Marked & CE Marked

The Lifepak 1000 defibrillator wall mount bracket offers a practical and secure solution for storing this crucial life-saving device, ensuring it is readily accessible in emergencies. Designed to keep the defibrillator in a visible and easily identifiable location, the bracket aids in the quick retrieval and proper return of the AED after use or maintenance, such as battery or electrode replacement. The inclusion of a handy clip strap provides an added layer of security, keeping the defibrillator firmly in place and reducing the risk of accidental dislodgement. This bracket is specifically tailored for the Lifepak 1000 Automated External Defibrillator, including the model with an ECG display and manual override, making it an essential accessory for maintaining the device's readiness and visibility in public or high-traffic areas. By promoting proper storage and ease of access, this wall mount bracket supports effective emergency response and equipment management.
